

Dimensions	84" wide x 84" long x 33" tall
Weight	1,025lbs when empty 4,773lbs when filled
Ground	Indoors or outdoors. Surface must be level and meet weight requirements. Deck, concrete pad, bricks, pavers or 4" of loose stone all work
Electrical	220V hard-wired connection on a 50-amp circuit, installed by a licensed electrician
Built-In / Recessed Installation	The AV-8 can be set into a deck or recessed below grade if service access is preserved. Plan for a removable deck section or drop-down access area so the mechanicals, controls, and filters remain accessible.

1	Hot Tub control panel: able to be inset into a wall or deck if desired
2	Magnetic panel access to equipment and filters
3	Pre-drilled electrical entry point. Concealed installation possible

Concealed Electrical Access Zone: 3" x 3" designated safe drill area for routing 240V electrical through the AV-8 base.

 3" x 3" zone for 240V powering the hot tub

Have questions about installation or want to talk through your setup? Call or text **424-253-0048** or email support@aquavoss.com.
